Group XIII, claim(s) 3-12, drawn to a nucleic acids, vectors and host cells encoding modified phytases and methods of making said phytases wherein modified phytase having a modification of a residue within 5 amino acids and/or 6 / of the alpha carbon of residue 43 of the mature *E. coli* phytase designated EBC18B2.

Art Unit: 1652

Group XIV, claim(s) 3-12, drawn to a nucleic acids, vectors and host cells encoding modified phytases and methods of making said phytases wherein modified phytase having a modification of a residue within 5 amino acids and/or 6 / of the alpha carbon of residue 46 of the mature *E. coli* phytase designated EBC18B2.

Group XVIII, claim(s) 3-12, drawn to a nucleic acids, vectors and host cells encoding modified phytases and methods of making said phytases wherein modified phytase

Art Unit: 1652

having a modification of a residue within 5 amino acids and/or 6 / of the alpha carbon of residue 126 of the mature *E. coli* phytase designated EBC18B2.

Group XIX, claim(s) 3-12, drawn to a nucleic acids, vectors and host cells encoding modified phytases and methods of making said phytases wherein modified phytase having a modification of a residue within 5 amino acids and/or 6 / of the alpha carbon of residue 184 of the mature *E. coli* phytase designated EBC18B2.

Group XX, claim(s) 31-12, drawn to a nucleic acids, vectors and host cells encoding modified phytases and methods of making said phytases wherein modified phytase having a modification of a residue within 5 amino acids and/or 6 / of the alpha carbon of residue 228 of the mature *E. coli* phytase designated EBC18B2.

Group XXI, claim(s) 3-12, drawn to a modified phytase having a modification of a residue within 5 amino acids and/or 6 / of the alpha carbon of residue 384 of the mature *E. coli* phytase designated EBC18B2.

Group XXII, claim(s) 3-12, drawn to a nucleic acids, vectors and host cells encoding modified phytases and methods of making said phytases wherein modified phytase having a modification of a residue within 5 amino acids and/or 6 / of the alpha carbon of residue 410 of the mature *E. coli* phytase designated EBC18B2.

Group XXIII, claim(s) 13-15 and 19, drawn to a methods of modifying a phytase.

The inventions listed as Groups I-XXIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The only shared technical feature of Groups I-XXIII is that they all related to a modified phytase having a modification within 5 residues and/or 6 / of the alpha carbon of residues 26, 43, 46, 54, 73, 113, 126, 184, 228, 384, or 410 of the mature *E.coli* phytase designated EBC18B2. However, this shared technical feature is not a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the art. Rodriguez et al. teach modified phytases having mutations at positions A131, V134, D207, and S211 (which correspond to positions 109, 112, 185, and 189, respectively, of the mature *E.coli* phytase designated EBC18B2). Thus the only shared technical feature of Groups I-XXIII is not a special technical feature as defined by PCT Rule 13.2.

4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Art Unit: 1652

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
